P-Series Phone System

Go boundless with easy-first unified communications

Easy to Use | Easy to Manage | Easy to Integrate
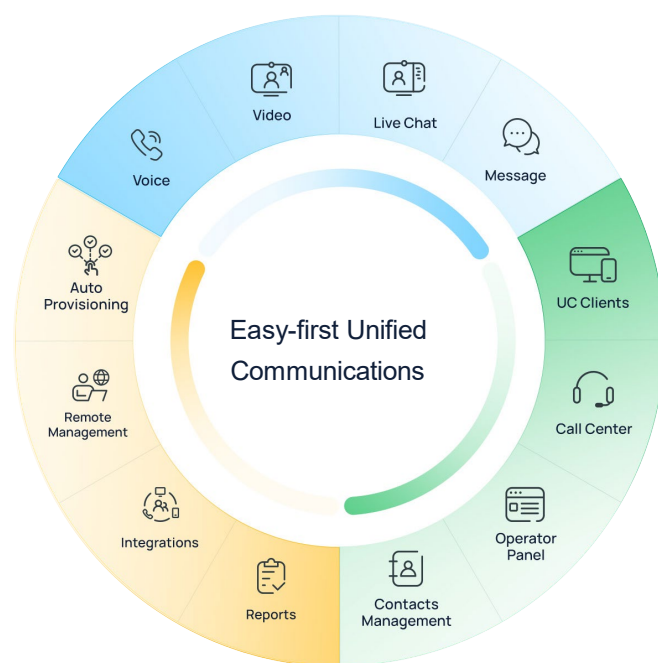

Easy to Adopt | Easy to Grow

## Modern communications powering business productivity

Focusing on delivering "Easy-first Unified Communications", Yeastar P-Series Phone System offers companies of all sizes with a complete package for calls, video, messaging and integrations, out of the box.

With inbuilt visual call management, integrated video conferencing, advanced contact center features, and ready-made SMS, WhatsApp, Microsoft Teams, CRMs, and more platform integrations, P-Series boosts productivity at all levels and provides everything across desktop, mobile, and browser with simple user apps.

Available in the Appliance, Software, and Cloud Edition, P-Series provides flexible deployment options, allowing you to have it sited on-premises or in the cloud. Balancing costs and future growth, it requires a lower total cost of ownership, less training, and fewer management efforts. The ease of use and future-proof adaptability is paramount.

Easy-first Unified Communications

Cloud Edition

The increased interest in UCaaS is creating tremendous opportunities for MSPs, VARs, and other channel partners. Yeastar P-Series Cloud Edition offers a ready-to-go turnkey solution, enabling you to quickly launch Cloud PBX business with just a few clicks and without setting up your own server. With minimal upfront costs and technical expertise, you can confidently deliver top-tier UCaaS while retaining full ownership of customers. For partners seeking more control, the P-Series Cloud Edition also supports BYOI (Bring Your Own Infrastructure), enabling you to host the entire UCaaS service delivery and management platform in your own cloud.

✓ Hosted by Yeastar   ✓ Faster Time to Market   ✓ Easier Service Delivery
Make the move from CapEx to OpEx

For those looking to avoid the complexities of cloud infrastructure, this turnkey solution eliminates the hassle and initial expenditure of setting up your own servers, thus reducing your risk of introducing a new service. All it takes is to purchase hosting packages through Yeastar Partner Portal, and you are ready to sell to customers immediately.

On top of a high availability architecture

With redundant servers for real-time replication and seamless failover, load-balanced infrastructure for maximum resource utilization, SBC and other security mechanisms guarding against malicious attacks, there's no need to spend extra time, effort, and expense on the upkeep and maintenance of the delivery environment.

Speed up the roll-out of your service

Through a built-for-purpose service delivery platform, Yeastar Central Management (YCM), it only takes a few clicks to create PBX instances of different capacities. With multiple nodes across the globe, you can select preferred hosted servers closest to your customers. The PBX will be up and running right away.Whether serving a handful of users, or even thousands, that's not a problem.

Customize & scale on-demand

As a prime opportunity to grow, this solution also enables you to create your own service packages, bundle IP phones and other hardware, and adds on SIP trunking and other services. Moreover, it is clicks away to scale up and down services and upgrade subscription plans for various needs, which in turn leads to a stickier customer relationship.

One interface for operating convenience

Besides viewing all PBX instances and customers in a list view, you can edit them directly and create tasks to automatically perform upgrades and other operations. The real-time information of cloud PBXs, tasks, alarms, and more, is also displayed in a dynamic widget-based dashboard for you to learn how services are going on at a glance.

Spot issues before customers do

With YCM automatically monitoring the status of all your customers' PBX instances, you get instant alerts when threats, security-related risks, or any other critical system issues occur, and can quickly diagnose and troubleshoot them before they hurt your bottom line. It ensures more seamless service while taking a lot of burden off your shoulders.
